Customer Reviews

This is a review of _The Complete Adventures of Curious George_. I know that I read (or had read to me) at least some of the Curious George books when I was in grade school. And I remember that I liked them. But that's almost all I remember. So, when we were given this book as a present for our two children, I didn't know what to expect. I am now in awe of what a wonderful series of stories this is. There are seven stories, published over a series of twenty-five years. By modern publishing standards, that's not a lot of books for a successful series. There's a reason for that: Margaret and H.A. Rey took their time to craft fine stories. These are stories that are written in a simple, comprehensible way, so my kids have been enjoying them since they were three years old. However, the stories are not "dumbed down" for children. The plots are interesting, with twists and turns. In "Curious George Gets a Medal," George goes from thinking about writing letters, to trying to clean up some spilled ink, to trying to find a pump to clean up some water, to trying to find an

animal to drag a pump, to a museum, where he meets the person who had written the letter that started him on his quest (!), to a rocket ride. This description cannot do justice to the natural flow the incidents have in the context of the story. The illustrations are in a bright, charming, and in what is (now) an immediately recognizable style. Unlike so many children's books, it is obvious that great care has been put into the illustrations. In one picture, George is shown floating over the city, carried aloft by some balloons he had taken.
