Customer Reviews

I bought these flash cards for my niece, and she is getting more division problems and more multiplication problems correct now! The flash cards are double-sided, and they are durable. This product is very inexpensive, and it is made in America!

Excellent! We made a game out of using these cards to help our son with the memorization and speed. He REALLY wants a dirt bike....he has to EARN the \$ to buy it....so, he gets \$1 for every 10 cards he gets correct! He got so excited and LOVES doing it! He has improved greatly very quickly and is finally MOTIVATED! He is working his way very quickly to getting that bike! LOL

cards are sturdy. These go through a lot at my house not just study time but my kids like to play school with them. They take a beating and have stood the test of time my youngest is just starting to use them and they are still in great condition.

We purchased these to help our young kids with their math and they have helped. Our kids are

significantly better with their math facts than they were prior. I like these better than home made cards (index cards with marker) because you can't see through them. Also they look nice and professional looking versus my normal home made flash cards.

At first I thought they were a little too big. But then I realised I could use them on the move with my kid. We could be outside walking somewhere, and at several meters distance and I could just 'flash' the cards at him. Good for getting a kid to learn and think while on the move. I now keep them close where I hang my jacket - so I can just put them in my pocket on the way out the door when we're off somewhere.

My literacy student and I drill with these to prepare her for the math portion of the GED. These are the division questions she needs to memorize, to recall quickly so that she can work out the harder problems on the exam. For this purpose, the cards are just right.

Having double sided cards makes it very hard to pick out just the facts you want to concentrate on. I highly recommend spending the extra money on single fact flash cards. But if you are willing to spend the extra time sorting cards and coaching your child to only look on one side, it gets the job done.

I mean they are flash cards so not much to say. I just wish the answers were in bigger type on the back of the card. One of my children has vision problems and looking at the tiny font on the back is difficult. All said, they do what I thought and offer opportunities to build and strengthen rote mathematical skills.
