Age Range: 4 - 8 years

Grade Level: Kindergarten - 3

Customer Reviews

These book are small, yes, but fit nicely in a goody bag for my son's birthday. They are bound well and the pages are thick; very nice quality. Lots of activities, perfect for pre-schoolers and young kids.

I ordered all the boos in these series, and mistakenly thought that they are of regular sizes.

Wrong!!!! These are very tiny, the size of my palm, may be slightly bigger. These are not good for kids because can barely see anything. Will not return bc didn't pay much, but this review is intended for those who are considering to order these.

Can't beat these prices, keep my kids busy in the car or on errands, at the doctor office, etc. They fit in my purse and my son loves having something to do, I love having something non-electronic to

keep him busy.

I received this book last week. It is much smaller than I expected, slightly larger than a deck of cards. I am using this book as a supplement to some activities that I use in my Preschool class. The upside is that there are many different activities available in this book, dot to dot, matching, seek and find, and many coloring pages. The activities will be very simple for my Preschool class to accomplish. The book is definitely worth way more than the small price I paid for it!

My daughter loves these little books. They're the perfect size to keep in the car or a diaper bag or purse. I keep them on hand for times when we're stuck waiting in a doctor's office or anywhere else.

The size is small! It's a better deal than the little sticker book having 52 pages of activities and 9 pages of solutions. More appropriate for crowded car rides or maybe a shoe box gift. Child should be able to read and write at 2nd grade level. Good quality paper (not newsprint thin).

I was hoping to cut out individual pages to put inside gift favor bags (space theme child's birthday party) but most of the activities involve looking at the left page to complete the activity on the right page. So that was a bust! Also, it's TINY...half the size of what I expected. About the size of my palm.

It was cute and small. Exactly what I expected to receive. I bought this as a reward for my child's homeschool progress. We are learning astronomy right now and this was a perfect, fun supplement.
