Dinosaur Discovery Dot-to-Dot

Synopsis

Children who love these fabulous creatures (and what kid doesn't?) will be delighted to find more than just the same old dinos in this super collection of 35-plus saurus dot-to-dots. Instead of just the familiar Diplodocus, Triceratops, and Tyrannosaurus, the species here include the Achelousaurus, with rough, bumpy knobs on its nose and over its eyes; the Eotyrannus, or "Dawn Tyrant", one of the earliest ancestors of the giant meat-eating tyrannosaurs; and the Neimongosaurus, whose fossils were recently found in China. Accompanying each dot-to-dot are facts on the dinosaur's name, size, when and where it lived, and more. Best of all, when kids have finished connecting the dots, they can take their crayons and color in the pictures however they like because no one knows what colors these animals really were.
